

Unstoppable Webinar Series

Unstoppable ABC Unified:

**A leader's checklist for
building innovation
that lasts.**

kami

Intro

ABC Unified, a school district of 18,000+ students, understands digital innovation is the cornerstone of learning success. The district embedded the Director of IT within Academic Services and set up a robust Technology Integration Program (TIP), so every device and data point serves a clear learning purpose.

If you're a school or district leader looking to advance learning impacts with Edtech, this checklist is for you.

Read on for ABC Unified's tips in harnessing IT innovation and optimizing budgets.

Checklist:

Smart funding & support

Align EdTech with all types of student groups that receive special funding, from special needs students, to those with second language needs, or foster youth.

Build a team of site tech champions and classified tech assistants who provide daily hands-on support, boosting teacher confidence.

Grow, collaborate, and get inspired by offering diverse, flexible PD options—large events, small-group sessions, and on-site coaching provide substitute cover.

Keep learning interactive, with students as in-classroom tech-navigators supporting teachers' tool proficiency and driving tool experimentation.

Cutting waste & reinvesting in growth

Regular software audits curb redundancies, freeing funds for impactful initiatives. For hardware buybacks of old hardware is another way to get back budget.

By investing equally in people and technology, it creates a framework where professional learning and coaching thrive alongside high-quality tech.

Leading with future-ready tech

Embraces AI and emerging tools thoughtfully to enhance creativity, personalize learning, and build digital citizenship.

Addresses teacher fears by showcasing practical, time-saving tech or real-world use cases that empowers both educators and students.

Focuses on student agency and critical thinking, preparing learners to thrive with whatever comes next.

Ready to unlock unstoppable innovation in your school?

Try Kami for interactive lessons and time-saving workflows. Explore Book Creator for students to demonstrate learning and create shareable artifacts. Enjoy Kami Companion for accessible self-directed learning on the web.

Trusted by more than 70 million teachers and students worldwide.
